

What do we know?*

Play 2014

This Cultural Perspective will explore the idea of knowledge. What is it? How can we be sure we have it? Can we categorise or even rank different types of knowledge? Along the way to answering these questions we will briefly alight on the work of Descartes, Russell, Popper, Ayer, Moore and more!

Week 1	How do we define knowledge? Traditional approach: Justified true belief. What do each of these words mean? Can we be justified in believing something which isn't true? Can we know something we aren't justified in believing?
Week 2	The logical structure of knowledge. Foundationalism in maths (geometry). Descartes attempt at deep foundationalism
